

Nelson's Moulding and Frame

REMOVABLE DMF TISSUE

S2822 Removable DMF Tissue-90x24.5

S2823 Removable DMF Tissue-90x40.5

Removable Tissue is virtually clear, acid-free and removable from textured materials. The adhesive completely melts when it is heated, bonds as it cools and is removable from textured materials when it is reheated. It conforms to the shape of materials, making it excellent for mounting irregularly shaped items.

Suited for: Textured Papers, Lithograph Papers, Watercolor Papers, Parchment, Canvas, Cotton Fabrics, Silk, Polyester Fabric, Brass Rubbings. RC Photographs, Fiber-based Photographs, Clay-Coated Papers, and Standard Posters.
