

STRIP HANGERS

S2201 Small

S2202 Large

One piece wire hanger with screw holes located above and below the ring for attaching wire. Use #2201 for heavy frames; screw holes are staggered to reduce the chance of splitting the frame. Eliminates the problem of screw eyes pulling out of soft woods.

SECURITY HANGERS

S2205 Metal Hanger

S2206 Wood Hanger

These hangers provide a secure method by which most metal, plastic and wood frames may be mounted to walls. This system will deter casual theft and also prevent pictures from shifting on walls. Ideal for offices, motels, restaurants, boats, and condominiums.
